

Printable Visual Schedule

With this easy-to-use template, you can now plan your child's schedule and customize it according to their needs. Simply print as many copies as you like, fill in the day, cut out the activity cards and organize them in whichever order you like, using tape or velcro strips to attach them on to the schedule sheet. When your child completes a task, have them move the activity card from the 'To Do' column to the finished column as a fun interactive way to let them take part in scheduling their day.

So if you're ready, grab some paper, scissors and tape and get to planning to make the most out of you and your child's day!

Today is _____

My morning routine

To Do

Brush teeth
